AED TRAINING

NorKam's physical education classes recently went through a brief practical course in CPR and AED training. They also learned about many other first aid related items. A big thank you goes out to the ACT Foundation of Canada. They were kind enough to donate many manikins to our school as well as four AED training devices and an actual AED unit. Hopefully our students won't encounter any incidences of cardiac arrest or any other medical emergencies within or outside of the school setting but if they do, they should be better prepared to know exactly what to do.
