### **About the ACT Foundation**

The ACT Foundation is the national charitable organization establishing **FREE** CPR and defibrillator training programs in Canadian high schools. The program is built on ACT's award-winning community-based model of partnerships and support—ACT raises funds to donate program start-up resources (e.g. mannequins, AED training units, teacher training, and defibrillators) to schools, and guides schools in program set-up to ensure long-term sustainability. ACT's health partners who are committed to bringing the program to high schools across Quebec and throughout Canada are AstraZeneca Canada and Amgen Canada.
